

Introducing Netwex

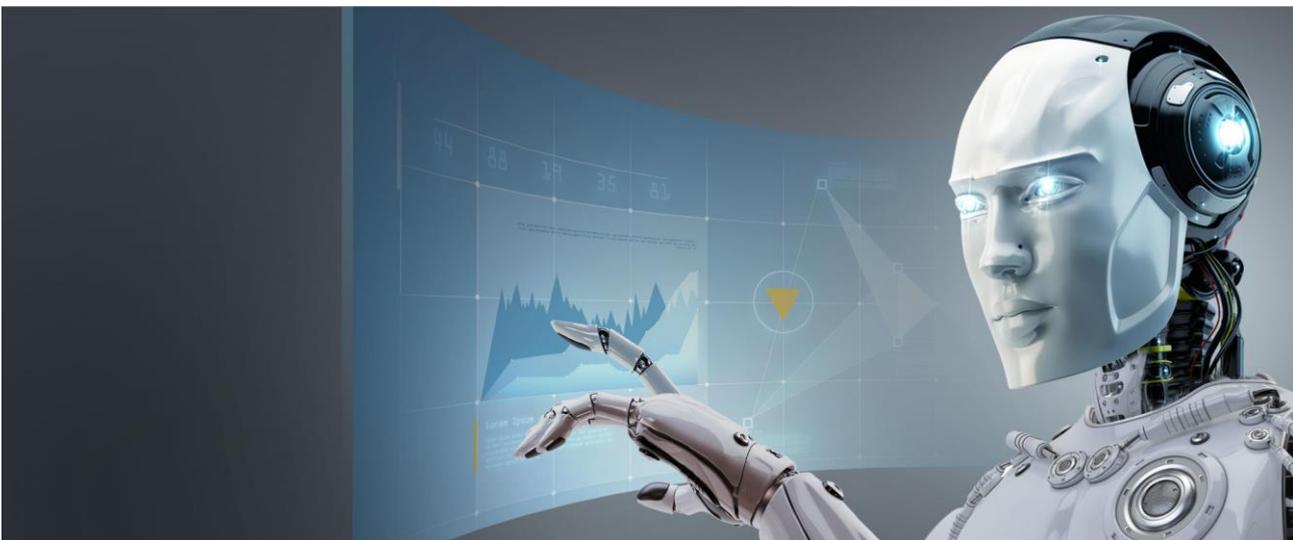

Chinese philosopher and writer Lao Tzu once said: “The key to growth is the introduction of higher dimensions into your awareness.” Netwex presents you higher dimension of financial growth, a state-of-the-art trading platform, driven by endless capabilities of supercomputers. Once available only to the largest of hedge funds, this trading platform is exclusively unlocked for you. Grab it now!

Defining Netwex

Netwex is an advanced, cryptocurrency based growth fund which offers a Capital Gain Program (CGP), trading, Earnings Per Coin (EPC) and mining platform to users. This platform is the culmination of a long standing dream - To bring the magic of Artificial Intelligence (AI) to the world of trading; and make it accessible to the masses.

Netwex SATB (*State-of-the-Art Trading Bot*)

At the very heart of Netwex lies something we call SATB. SATB is a self-learning, AI based trading algorithm which is way ahead of our times and other 'trading bots' available in the market. However, It is not the usual run of the mill pre-fed trading platform. It is something truly intelligent, something much brilliant that it learns from every transaction, every trade it makes.

Self-Improvisation is the word that justifies the process behind *State of Art Trading Bot*, SATB. For our users, it means that they can now take advantage of some really advanced, cutting edge technology which was once available only to the world's largest hedge funds; and earn substantial returns on their investments

Working of NXE Trading

3 Steps of making smart money

Users buy NEX coins and lend it to Netwex's SATB.

SATB spells its charm and generates Return over Investment through Digital Asset Trading and Arbitrage in International Markets.

Lender gets a substantial share of the profits generated & the remaining is ploughed back into advancing SATB's capabilities. This augments the Intellectual Property valuation, hence appreciating the NEX coin's value.

How's Netwex SATB Different?

Netwex SATB is an epitome of automated trading. Even the best of trading automation solutions that exist in the market today only use a STATIC trading strategy. On contrary, Netwex SATB uses a self-learning, Artificial intelligence based trading algorithm. What it means in simple terms is that instead of using a few fixed trading methods every time, Netwex learns with every trade it makes and keeps improving its trading strategy at a rapid pace. SATB's current algorithm is already armed with years of training data so you get to benefit from all of that right out of the gate. This key improvement is our secret sauce and this is what makes all the difference. Boiled down in mathematical terms, Netwex SATB uses:

High quality Technical Analysis (TA) with Conclusive market Data (MD) and combines them to perform High Frequency Trading (HFT) powered by Artificial Intelligence (AI)

Why Should You Be Interested In Netwex?

It's as simple as this... All ultra-successful people in the world have one thing in common: They think ahead of the times and stay ahead of the curve. They have a vision for the future. If you count yourself in that league (or would want to), you don't need any more reasons to be interested.

Looking for ONE more reason?

We'll give you SIX!

The crypto space presents an opportunity for some really exceptional upside as it is. We are able to turbocharge this potential to completely new levels by using some really cutting edge, state of the art technology. We combine Artificial intelligence with solid mathematical modelling and extremely high quality technical analysis. This makes our Netwex SATB a perfect combination of human ingenuity and machine capabilities.

1. Exceptional Profits

These profits are made possible by using a highly scientific approach to trading. We believe that there's a science behind everything and trading is no different. Over the years, we have been able to repeatedly polish and refine our trading strategy in various kinds of markets, be it commodity, bonds, forex and now, Cryptocurrency. Combining these time honed strategies with the power of Artificial Intelligence, has unlocked a totally new level of returns which were never possible using a conventional approach.

2. Scientific Approach

Despite the amazing profit potential, our users face absolutely zero risk when it comes to the security of your digital assets and associated returns. We enjoy healthy margins over and above what is offered to our users and ensure substantial liquidity at every point of time. Despite having a plethora of complex algorithms working behind the scenes, Netwex SATB platform is extremely simple to use. Whether you're already a savvy user or just getting started, you would be able to appreciate the simplicity and intuitiveness built into the platform.

3. Ease of Use

We deploy the most sophisticated security infrastructure available throughout the industry to protect your digital assets. Once on Netwex's SATB platform, you can enjoy complete peace of mind in the knowledge of the fact that all your digital assets are fully insured against any and all kinds of threats. Working with Netwex, you can be sure of smooth sailing. But in case issues arise and you need help somewhere, a solid support backup is available for all kinds of issues that you might imagine.

4. World Class Support

There were multiple ways in which we could have implemented the lending platform on Netwex SATB. After all due diligence, it was decided to develop our own cryptocurrency to form the basis of our platform. This enables Netwex to use the speed, power and flexibility of the underlying blockchain technology. Besides, the NEXcryptocurrency also acts as an index of the company's valuation. As the company grows in capability, intellectual property and influence, the value of the cryptocurrency appreciates in proportion. This allows Netwex users to participate and profit from company's growth and opens a totally new dimension through which they can grow their wealth.

5. Trust

6. Security & Peace of mind

Modus Operandi

You loan your Netwex coin holdings to the SATB system, on doing so, you start receiving SATB profits every 24 hours.

The SATB profits are based upon the trade earnings made by the SATB trading algorithm on that day. With an exceptionally narrow range of day-to-day basis, you start accumulating your share of trade earnings in your Netwex account.

Summing it all, Netwex offers SATB profits of up to 49% per month on your CGP amount.

CGP Amount	Interest (Paid daily)	Daily Accrued Interest	Capital Released
\$100 - \$1,000	Auto trade bot system	Auto trade bot system	After 180 Days
	Up to 49% Per Month		
\$1010 - \$5,000	Auto trade bot system	Auto trade bot system Auto trade bot system +0.15% Daily	After 180 Days
	Up to 49% Per Month		
\$5010 - \$10,000	Auto trade bot system	Auto trade bot system +0.25% Daily	After 180 Days
	Up to 49% Per Month		
\$10,010 - \$100,000	Auto trade bot system	Auto trade bot system +0.30% Daily	After 180 Days
	Up to 49% Per Month		

As it is evident from the data above, Netwex cryptocurrency value enjoys a huge growth upside. Some of the reasons for the same are:

- ✚ Supply wise, Netwex is one of the scarcest cryptocurrency among all conventional CGP and EPC platforms. Simple math says that Low Supply = High Price
- ✚ Netwex coin's valuation also is an index of the company's valuation and because of rock solid fundamentals, it will grow rapidly.

For above reasons, users who would like to trade the cryptocurrency also have a positive profit opportunity. The EPC system will allow you to earn an interest on the part of NXE coins that you chose to venture through the platform. For users looking for a method different than CGP, this could be another possible option.

For users who have some experience with mining and would like to go this route, you can mine NXE and generate a positive income stream from this method also. Besides the methods mentioned above, you can turbocharge your already huge profits to a whole new level by leveraging the power of your network.

The Netwex network income offers a healthy referral income upto 7% for multiple levels of your team. This ensures that you not only benefit from the activity of the users you referred directly but also from their respective teams. This presents an excellent opportunity for users who have a good online or offline network.

-The Power of Your Network

Technology Blockchain is proving to be one of the most influential technologies of our times. In terms of impact, it's going to stand at par with the likes of the Internet and the PC. For the first time in mankind's history, we have a solution that has proven to be completely immutable and ultra secure against any and all kinds of hacking, cracking and tampering attempts. This opens up a whole new world of possibilities of what can be done with this technology.

NXECryptocurrency is at the forefront of this technological revolution and harnesses the powers of the amazing blockchain technology in new, innovative ways.

-Blockchain

Just as we have used the most cutting edge technology for building our SATB platform, we wanted to have an equally solid technology foundation for NXE cryptocurrency. Ethereum's ERC 23 is the latest and the greatest cryptocurrency platform available today. Being based on blockchain, NXE cryptocurrency is able to enjoy all advantages offered by a decentralized P2P architecture.

-Decentralized P2P Architecture Smart Contract

Smart Contracts is a totally new way of implementing real world contracts in a digital fashion. Being based on blockchain, smart contracts enjoy the same resilience, security and immutability as other blockchain based applications. NXE cryptocurrency benefits from the power to deploy smart contracts in new, innovative ways. Moving ahead (as is evident in our roadmap also) Netwex will bring out its own complete smart contract platform.

-Security

The biggest puzzle solved by blockchain technology is that of security. Prior to the advent of blockchain, anything on the internet was inherently considered prone to attacks and vulnerabilities.

For the first time in the history of mankind, the Blockchain technology has offered a solution which has proven to be impenetrable against all kinds of hacking attempts from all over the world. With Netwex, you enjoy the same level of security in all your transactions with us. You can rest assured, knowing full well that your digital assets are secure and protected. You don't have to be great to start, but you have to start to be great.

NXE Waste-to-Mining...

...Making a Difference!

Today in this era of technological advancements and digital innovation, there is an ever-increasing demand for energy to power these innovations. These requirements pose a real threat to environment considering, the energy required is obtained from depletion of fossil reserves.

NXE is all set to introduce one of the most advanced, self-learning and eco-friendly mining solution, a state-of-the-art waste to energy plant. In the waste-to-energy plants, bio-degradable waste will be collected, processed and transformed into clean energy. Thus, creating a sustainable culture to fulfill insatiable energy demands of the crypto currency mining projects.

The efficiency, excellence, and sustainability of NXE will be driven by recovering CO₂-neutral fuel from biomass and further using this fuel to produce clean energy with extremely low emissions. The energy produced will power crypto mining farms, reducing our dependency on already scarce fossil fuels. This revolutionary method will also address Waste surplus and Energy shortfall crisis.

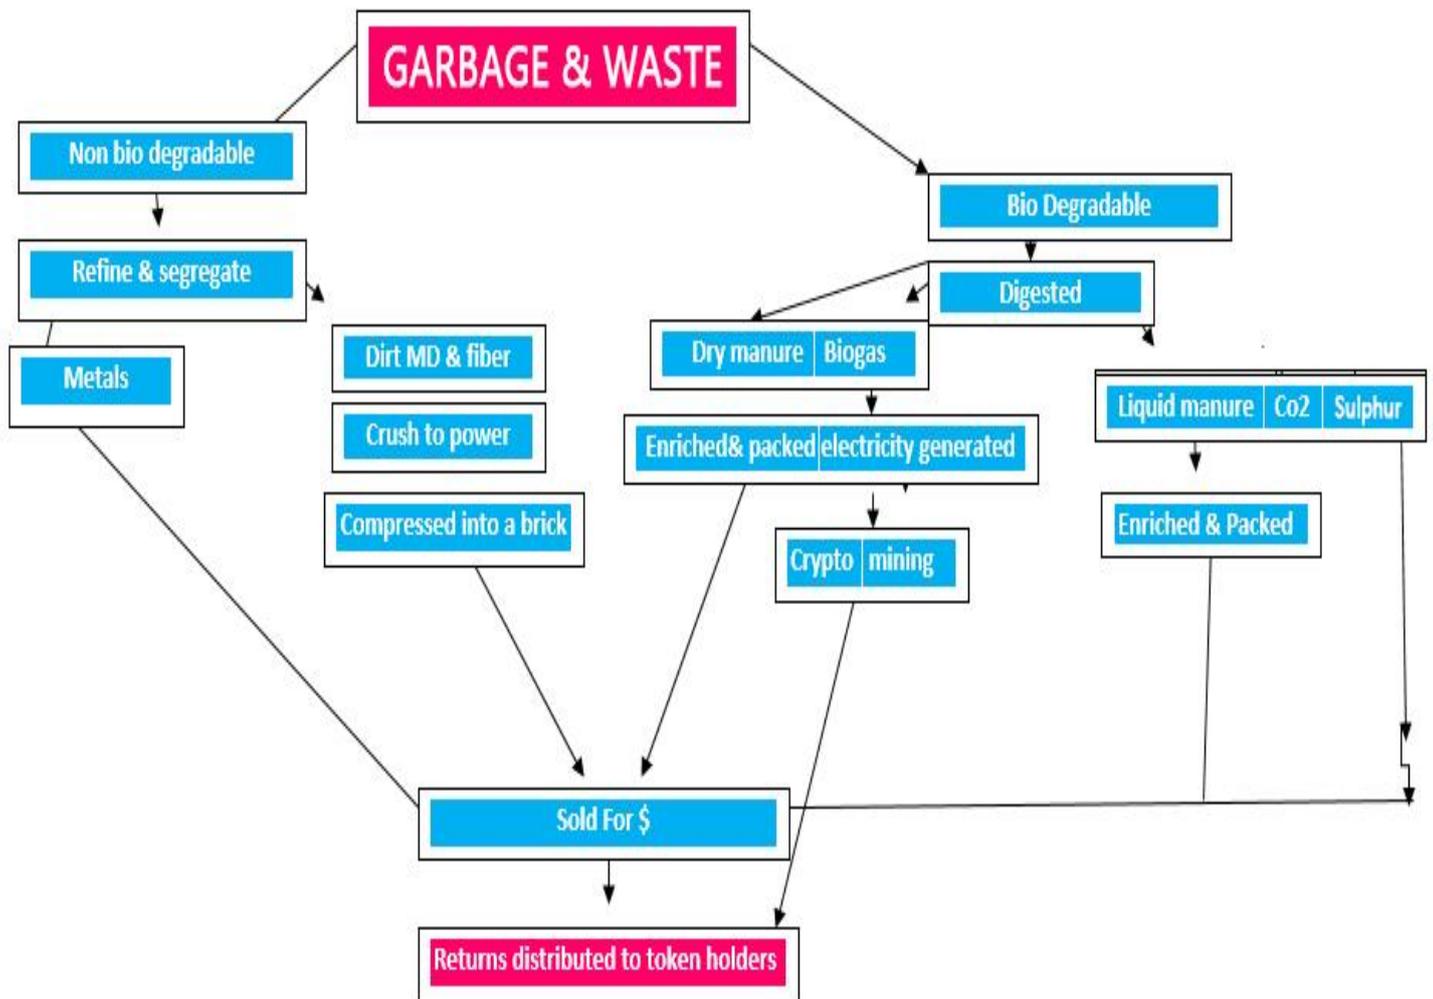

Approach to Achieve

NXE is geared up to open its ICO for crowd sale in February 2018. 30% of the funds raised through ICO will be invested to develop and install Waste-to-Mining power plant. First phase of which is planned to accomplish around July 2018. Subsequently, completion of Phase II will be achieved by the end of year 2018. Finally, the beginning of 2019 will mark the commencement of Self-Powered Mining Farm.

How It Works?

Waste material is collected in an enclosed area, where it is thoroughly segregated into Non-Biodegradable and Biodegradable mass. Non-biodegradable waste is then crushed and compressed into bricks. These bricks and segregated metal are then sold and exchanged for money. On the other hand, bio-degradable waste is digested by powerful

machinery available, which in turn yields manure and biogas. Manure makes its way to get enriched and packed and then sold to get returns. The fuel, biogas, is our key business asset that helps in generating clean electricity which in turn powers our Crypto-Mining farms. The returns obtained from the above process are distributed to Token Holders and fed back into the system for improvisation.

Thank you for your interest in Netwex. Please join us on our website or other social media for more details. We are looking forward to see you there!
